2020 Summer Review

Name:

Read these instructions very carefully, before you start your work !!

Answer the questions and perform the operations indicated in each problem in this packet. When doing your work, the following are my requirements:

- I will collect this packet on the first day back in school from summer vacation. It will be graded and recorded as a quiz. I recommend that you do not leave it until the last night.
- You may collaborate with classmates, parents, brothers or sisters and so on. You may also look at your notes and other helpful resources. You may not use online graphing or problem-solving sites.
- You may not use calculators.
- I do not want to see any decimal values. Use fractions only.
- Your work must be done in pencil. If there is any pen at all on this packet, including your name, you will get a 0.
- Your graphs must have labelled axes, a clear scale and arrows on all lines that are infinite, including the axes.
- Show your work. An answer, without any work is not acceptable, unless it is such a simple problem it can easily be done in one simple mental step.
- If you are unable to print this packet, you may do your work on separate paper. If you use separate paper, you must copy the original problem from the packet.
